

From kit to learning momentum.

The end-to-end operating playbook for ICT & Digital Platform Enablers delivering Reflective-funded programmes in South African schools.

Run the first session →

Open field checklists

🕒 Implementation standard · Version 1.0 · September 2026

🛡️ Owner: ICT & Facilitation Manager

Ready kit
Access

Clear guidance
Confidence

Active learning
THE OUTCOME

Clean evidence

Accountability

60 min

recommended learner access per week

81

Maths concepts across seven trajectories

30 min

arrival before the first session

1 role

turning technology into implementation

THE MANDATE

Enable the conditions for every learner to progress.

Reflective addresses hidden learning gaps in Maths and English. Numerate diagnoses gaps, builds an individual catch-up path and checks mastery. The Enabler makes that model work reliably in a real classroom.

ENABLER OWNS

Access, flow & evidence

- ✓ Prepare and protect the ICT kit
- ✓ Guide login and correct platform use
- ✓ Resolve in-scope technical issues
- ✓ Monitor engagement and active minutes
- ✓ Record and escalate implementation facts

ONE
CLASSROOM

EDUCATOR OWNS

Teaching, behaviour & safety

- ✓ Lead the class and learning environment
- ✓ Handle discipline and behaviour
- ✓ Answer curriculum or content questions
- ✓ Use progress data for teaching decisions
- ✓ Apply school safeguarding procedures

The bright line: the Enabler facilitates platform use and technical access. They do not teach assessed content, supply answers, lead discipline or replace the educator.

Six connected stages. One accountable loop.

01

Mobilise

Align school, timetable, learners, kit and connectivity.

Manager + school

02

Prepare

Train, rehearse, test devices and open the platform.

Enabler

03

Orient

Set expectations and move the class through shared checkpoints.

Enabler + educator

04

Enable

Protect learning time, solve technical blockers and sustain focus.

Enabler

O5

Evidence

Record attendance, uptime, progress, issues and learner wins.

Enabler

O6

Improve

Review weekly data, actions and programme risks.

Programme team

Ready access

+

Correct learner start

+

Protected learning time

Usable evidence

||

Programme impact

BEFORE LEARNERS ARRIVE

Readiness is designed, not hoped for.

Arrive at least 30 minutes before the first session. Work left-to-right; do not admit the class until the minimum conditions are green.

DAY BEFORE

Align

Confirm timetable, class list, educator, venue, accounts, school contact and any rotation plan.

Output: confirmed session plan

T-30 MIN

Build

Count and power the kit, connect Wi-Fi, check chargers/headphones, open the login page.

Output: device readiness count

T-10 MIN

Prove

Test one real login, open Numerate, verify the correct journey and prepare attendance and issue logs.

Output: tested learner path

T-2 MIN

Brief

Agree roles with the educator: Enabler handles platform flow; educator handles teaching and discipline.

Output: go / recover / reschedule

GO GATE

Start when the session can produce meaningful learning—not merely logins.

✓ Educator present

✓ Safe venue

✓ Usable devices

✓ Working access

✓ Reporting tools ready

A five-checkpoint learner kickstart.

Use one rhythm throughout: **Stop** → **Show** → **Do** → **Check**. Give one instruction at a time. Demonstrate it. Let learners act. Scan the room before moving on.

01

CHECKPOINT 01 / 05

Tablet, card, login — then wait

SAY THIS

“You’ll receive a tablet and a login card. Enter the details exactly as shown. When you reach the home screen, place the tablet flat and wait for the next instruction.”

✓ VERIFY BEFORE CONTINUING

Name or account is correct; learner is on the home screen; no one starts early.

ILLUSTRATIVE VIEW

Replace with an approved current platform capture during rollout.

80%

Use the majority threshold to pace—not to abandon. When roughly 80% are at the checkpoint, give the next instruction only after the remaining learners are identified and receiving support. If the gap is widespread, stop and reset the whole class.

01 · ACCESS

Tablet, card, login — then wait

Say: “You’ll receive a tablet and a login card. Enter the details exactly as shown. When you reach the home screen, place the tablet flat and wait for the next instruction.”

Verify: Name or account is correct; learner is on the home screen; no one starts early.

02 · SUBJECT

Choose the Maths bubble

Say: “Find the Maths bubble and tap it once. When the Maths home opens, stop and wait.”

Verify: Maths / Numerate is open for every learner—not English / Lingo.

03 · PURPOSE

Explain the seven journeys

Say: “Numerate organises 81 important maths concepts into seven journeys. Each starts by checking what you already understand, then gives you your own catch-up path. You do not need to move at the same pace as anyone else.”

Verify: Learners understand that locked journeys protect foundations and are not a punishment.

04 · INTEGRITY

Set the assessment rules

Say: “This diagnostic does not count toward your school marks. Work independently: no help, calculator, notes or copying. Make your own best attempt so the programme can give you the right learning.”

Verify: Learners can repeat the rules; educator agrees to redirect content questions.

05 · RELEASE

Open Numbers and follow the prompts

Say: “Your first journey today is Numbers. Tap Numbers and follow the prompts. Raise your hand only if the device, login or page is not working.”

Verify: Physically scan screens: all learners are in Numbers—not Data Literacy or another journey.

DURING THE SESSION

The Enabler control loop.

Once learners begin, the Enabler stays in motion. The goal is to remove friction without interfering with the diagnostic or personalised pathway.

Protect

active learning
minutes

01

Observe

Scan screens, posture and progress.

02

Triage

Is it technical, learning or behaviour?

03

Act

Fix, redirect or involve the owner.

04

Confirm

Verify the learner is moving again.

05

Record

Capture impact if it matters later.

✓ ENABLER MAY

- Repeat navigation instructions
- Fix login, device or connectivity issues
- Explain how to use a platform control
- Encourage persistence and use of Help
- Redirect a learner to the assigned journey

× **ENABLER MAY NOT**

- Explain an assessed maths answer
- Hint, calculate or eliminate options
- Let learners share answers or accounts
- Skip diagnostics to make progress look better
- Handle discipline in place of the educator

Name the problem before solving it.

Fast classification prevents the Enabler from becoming a teacher, disciplinarian or unsupported technician.

LEARNER IS STUCK

What is blocking progress?

Technical

Device, login, Wi-Fi or platform.

Enabler resolves in scope

Then confirm + record

Learning

Question, concept or assessed answer.

Platform Help / educator

No answer coaching

Behaviour

Refusal, disruption or conflict.

Educator leads

Enabler supports reset

Close the learning loop—and the evidence loop.

T-10

1

Warn

Give a time signal; avoid stopping mid-response where possible.

T-5

2

Save

Confirm progress sync; guide logout without exposing credentials.

T-3

3

Recover

Collect and count tablets, cards, chargers and headphones.

T+5

4

Record

Submit attendance, active access, uptime, issues and outcomes.

T+10

5

Escalate

Send unresolved blockers to the right owner with evidence.

ATTENDANCE

Who was booked, present and able to log in?

ACCESS

How many meaningful active minutes were delivered?

UPTIME

How many devices were usable for planned session minutes?

IMPACT

What blocked delivery—and what changed for a learner?

GOOD ISSUE RECORD

"09:18–09:31 · 8/24 tablets showed 'server unavailable' despite Wi-Fi access. Refreshed once and tested another site. Screenshot attached. ICT Manager notified 09:24. 104 learner–minutes lost."

AVOID

"Internet bad. Session struggled."

Resolve once. Escalate with context.

Never spend the session repeatedly trying the same fix. Protect learning time, collect evidence and route the blocker to the accountable owner.

SIGNAL	FIRST RESPONSE	ESCALATE WHEN	OWN
Learner cannot log in	Check card, spelling, spaces, Caps Lock and assigned account; retry once.	Account still rejected or learner record is wrong.	ICT M
No internet on one device	Toggle Wi-Fi, reconnect, compare with a working device, restart browser/device.	Device remains offline while others work.	ICT M
No internet on all devices	Check router/power, network indicator and whether another site opens.	More than 20% of learners blocked for 5 minutes.	ICT M
Platform/server error	Refresh once, reopen page, clear cache only if trained; do not repeatedly submit.	Same error on multiple connected devices.	ICT M
Wrong journey	Pause learner; return to Maths home; select Numbers.	Navigation is locked or assignment appears incorrect.	ICT M
Disruption or refusal	Use calm re-engagement and restate the task.	Behaviour affects safety or learning after one redirect.	Educ
Timetable / teacher blocker	Confirm the agreed session slot and minimum session conditions.	Class, venue or educator repeatedly unavailable.	Scho
Safeguarding concern	Do not investigate or promise secrecy; keep the learner safe and follow school policy.	Immediately.	Desig lead

- S1 Critical** Safety, safeguarding, theft or total programme outage · immediate
- S2 Major** More than 20% blocked or session at risk · within session
- S3 Routine** Isolated issue with workaround · daily log

Three checklists. One reliable habit.

Use these live on a phone or print this page. Completion state stays on this device only.

0/8

Ready the room

Reset

☐

Confirm timetable, venue, class list and educator attendance.

☐

Charge tablets and verify chargers, headphones and kit count.

☐

Confirm learner accounts and print or sort login cards.

☐

Test Wi-Fi and distinguish local connectivity from platform errors.

☐

Open the Reflective login page on every available device.

☐

Place devices according to the seating or rotation plan.

☐

Open the attendance register, issue log and escalation contacts.

☐

Agree the educator signal for discipline or content support.

0/8

Launch & enable

Reset

☐ Introduce the purpose: diagnose gaps, catch up and demonstrate mastery.

☐ Issue one tablet and one login card per assigned learner.

☐ Use the stop–show–do–check rhythm at every checkpoint.

☐ Confirm every learner selected Maths / Numerate.

☐ Confirm every learner is in the Numbers journey before release.

☐ State assessment rules and ask learners to repeat them back.

☐ Roam continuously; resolve access and device issues without coaching answers.

☐ Protect focused active–learning time and flag disengaged learners.

0/8

Close & evidence

Reset

☐ Give a two–minute warning and guide learners to stop safely.

☐ Confirm work has saved or synced before logout.

☐ Collect every tablet, login card, charger and headphone.

☐ Count, inspect, charge and store the ICT kit securely.

☐ Complete attendance, session status, uptime and issue records.

☐ Escalate unresolved blockers with evidence and impact.

☐ Share progress flags with the educator or school champion.

☐ Capture one specific learner win or implementation insight.

Five-minute Enabler kickstart video.

A short demonstration should accompany this SOP. Film a real room setup and use approved, current platform captures for every learner-facing click.

00:00–00:25	01	Why the role matters Enabler converts access to active learning; educator retains teaching and discipline. ON SCREEN · Role boundary split-screen
00:25–01:05	02	Room ready Arrive 30 minutes early; count, connect, test and pre-load. ON SCREEN · Fast kit and Wi-Fi checklist
01:05–02:45	03	Five learner checkpoints Model the exact stop–show–do–check sequence from login to Numbers. ON SCREEN · Illustrated learner screens
02:45–03:25	04	Assessment integrity No hints, calculator or copying; technical support only. ON SCREEN · Green / red support examples
03:25–04:15	05	Enable the session Roam, triage, re-engage, monitor active learning and involve the educator. ON SCREEN · Room movement map
04:15–05:00	06	Close and evidence Sync, logout, count kit, report data and escalate blockers with evidence. ON SCREEN · Close-out checklist + sample issue

Production acceptance checklist

✓ Approved UI captures

✓ English captions

✓ Afrikaans / isiXhosa subtitle option

✓ Mobile-legible text

✓ No learner personal data

✓ Version/date slate

GOVERNANCE

Measure implementation without rewarding shortcuts.

01

Device uptime

$\geq 80\%$

Usable device-minutes ÷ planned device-minutes.

02

Login success

$\geq 80\%$

Booked learners who successfully access the assigned path.

03

Session success

$\geq 90\%$

Scheduled sessions delivering at least 45 meaningful minutes.

Reporting

100%

Session record submitted accurately and on time.

Approval note: the supplied draft mixes the labels for login success and computer uptime. The definitions above separate them for operational clarity. The programme owner should confirm final thresholds and reporting fields before issuing this SOP.

DAILY

Readiness → session → close-out → issue escalation

WEEKLY

Dashboard review → stuck/flying learners → blocker actions → reflection

MONTHLY

KPI trend → equipment health → school adoption → improvement plan

DOCUMENT CONTROL

Built for controlled rollout.

This playbook consolidates the supplied Enabler SOP, Training & Development framework, vacancy role definition and Reflective's public Numerate guidance. Platform screens are illustrative until replaced with approved captures.
